Hytek AdBlue®/DEF Pump
with switch and 7 min timer

HYTEK
Fluid Transfer Solutions

- 230V
- 7 minute timer
- 1.8m mains cable
- Weatherproof to IP55

Product Details:

This HYTEK approved 230V AdBlue® pump is an ideal transfer solution for fixed pumping solutions, and comes with a timer as standard. It is commonly used on bulk tanks and static IBC applications. This pump comes complete with a timer that automatically switches the AdBlue® pump off after 7 minutes of running, helping to prevent damage if the pump is accidentally left running.

The pump runs at 30L/minute and is ideal for refilling cars, vans, and light trucks, making it a popular choice in the agricultural, construction, and plant sectors. It can also be used with a flow meter (not included) to register the amount of AdBlue® dispensed.

Key Features and Benefits:

- Suitable with AdBlue®, water, and antifreeze
- Built-in timer that switches the pump off after 7 minutes of running to prevent damage to pump
- Dispensing flow rate of up to 30L/min
- Self-priming diaphragm pump
- Maximum run time: 20 minutes
- On/off switch
- Bypass valve
- 1.8m long mains cable and plug
- Weatherproof to IP55 for outdoor use
- 1" BSP male parallel ports with 3/4" hose tails
- 2 year parts warranty offered as standard
